Warren Hament is a bright young man who wanders into a career in finance in

the early 1980s. Nothing Personal is the extraordinary story of his rapid ascent toward success, painted against a landscape of temptation and personal discovery. Introduced to the seductive, elite bastions of wealth and privilege, and joined by his gorgeous and ambitious girlfriend, he gets a career boost when his mentor is found dead. Warren soon finds himself at the center of two murder investigations as a crime spree seemingly focused on powerful finance wizards plagues Wall Street. The blood-soaked trail leads to vast wealth and limitless risk as Warren uncovers unexpected opportunity and unknown dangers at every turn and must face moral dilemmas for which he is wholly unprepared. Nothing Personal is a stellar debut novel, which follows an increasingly jaded protagonist as he comes of age in a rarified, deeply corrupt world. Offit, a former senior insider, unflinchingly divulges Wall Street's culture of abuse and portrays the insidious, creeping forces of greed, sex, and power---and the terrible price paid in their thrall.

There are few industry sectors in the world today with more potential than renewable and hydrogen energy. Clean, green and renewable energy technologies are receiving immense emphasis from investors, environmentalists, governments and major corporations. Today's high prices for crude oil, coal and natural gas will increase the demand for renewables of all types. A wide variety of technologies are being researched, developed and implemented on a global basis, from Stirling engines to wind power, from advanced nuclear plants to geothermal and fuel cells. Our analysis also includes tar sands (oil sands), oil shale, fuel cells, clean coal, distributed power, energy storage, biofuels and much more. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. It contains thousands of contacts
