Early in the year, our North American forests come to life as native wildflowers start to push up through patches of snow. With longer days and sunlight streaming down through bare branches of towering trees, life on the forest floor awakens from its winter sleep. Plants such as green dragon, squirrel corn, and bloodroot interact with their pollinators and seed dispersers and rush to create new life before the trees above leaf out and block the sun's rays. Wake Up, Woods showcases the splendor of our warming forests and offers clues to nature's annual springtime floral show as we walk in our parks and wilderness areas, or even in shade gardens around our homes. Readers of Wake Up, Woods will see that Gillian Harris, Michael Homoya and Shane Gibson, through illustrations and text, present a captivating look into our forests' biodiversity, showing how species depend on plants for food and help assure plant reproduction. This book celebrates some of nature's most fascinating moments that happen in forests where we live and play.

A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and caf  s. When Morris published Last Letters from Hav in 1985, it was short-listed for the Booker Prize. Here it is joined by Hav of the Myrmidons, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris' s only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be. An anthology of writings on atheism, agnosticism, and skepticism by some of the world's most celebrated thinkers.

We call it a gismo. That's right, a gismo. A bit difficult to describe. Like a cross, I suppose, without the top part. Sort of two arms on a stand. What happens is this. You hang something on one arm. Anything at all. A watch, a bracelet, money, anything. I supposed you could hang a locomotive on, only it's a bit heavy. But anyway you hang something on and there on the opposite arm appears an

exact replica. And I mean exact. You can't tell the difference. So nobody need make anything any more. What you need you hang on the gismo. No work. No want. No starvation. No nothing. When you've got a gismo, you've got everything.

From the New York Times Bestselling Author and Co-Star of Fox's American Grit comes a rare and powerful book on the art of being a sniper. Way of the Reaper is a step-by-step accounting of how a sniper works, through the lens of Irving's most significant kills - none of which have been told before. Each mission is an in-depth look at a new element of eliminating the enemy, from intel to luck, recon to weaponry. Told in a thrilling narrative, this is also a heart-pounding true story of some of The Reaper's boldest missions including the longest shot of his military career on a human target of over half a mile. In Iraq and Afghanistan, Nick Irving earned his nickname in blood, destroying the enemy with his sniper rifle and in deadly firefights behind a .50 caliber machine gun. He engaged a Taliban suicide bomber during a vicious firefight, used nearly silent sub-sonic ammo, and was the target of snipers himself. Way of the Reaper attempts to place the reader in the heat of battle, experiencing the same dangers, horrors and acts of courage Irving faced as an elite member of the 3rd Ranger Battalion, 75th Ranger Regiment, while also examining the

personal ramifications of taking another life. Readers will experience the rush of the hunt and the dangers that all snipers must face, while learning what it takes to become an elite manhunter. Like the Reaper himself, this explosive book blazes new territory and takes no prisoners.

Raised with limited peer interaction, Ernestine St Bennett has difficulty interpreting social cues. At twenty-five she's become a loner; a shy nerd immersed in her scientific studies, whose best friend is her pet fish, Waldo. Then Ernestine meets Simon Prime, who's obviously a nerd, too! Sympathizing with his social dysfunction, Ernie decides to help poor Simon increase his self-esteem and thus enhance his social standing. Using principles learned in her fish studies, she'll simply turn Simon from meek to macho. What Ernestine doesn't know (but Waldo suspects) is that Simon Prime is really ex-cop, private investigator Sam Pierce in disguise. A man who definitely doesn't need his masculinity enhanced!

From the foreword: "One of the High Line's powers is its ability to evoke time, to remind us of the changes we've experienced during our own lives, to bring forth echoes of the past, and to make us guess what life might be like years from now. I love the photos on these pages, because they have that power, too."

--Joshua David, Co-Founder of the Friends of the High Line. Ten Avenues Press, in association with Friends of the High Line, announce the publication of *High Line Nudes*. In

2006, photographer Kevin McDermott took three of his friends up on the abandoned railroad tracks that would become New York City's High Line park to shoot a series of nudes. As McDermott states in his introduction, "at the time I took these photos, what I sought from its beauty was its sense of isolation, being alone, surrounded by nature in the middle of this metropolis." A decade later, this location is now one of the most visited tourist destinations in NYC and one of the largest real estate developments in the world. *High Line Nudes* captures a seemingly impossible, but beautiful moment in the history of the West Side Rail Yards, Chelsea and an ever-changing New York City. The cloth hardcover book is beautifully printed in color and rich black and white duotone images.

This collection, which won the 2015 Costa Poetry Award, is an exhibition of the Dundee-born poet's stunningly accomplished adoption of the sonnet's ancient structure. This collection from Don Paterson, his first since the Forward Prize – winning *Rain* in 2009, is a series of forty luminous sonnets. Some take a traditional form, while others experiment with the reader's conception of the sonnet, but they all share the lyrical intelligence and musical gift that has made Paterson one of our most celebrated poets. Addressed to friends and enemies, the living and the dead, children, musicians, poets, and dogs, these poems are as ambitious in their scope and tonal range as in the breadth of their concerns. Here, voices call home from the blackout and the airlock, the storm cave and the space, the coal shed, the war, the highway, the forest, and the sea. These are voices frustrated by distance and darkness, which ring with the "sound that fades up from the hiss, / like a glass some random draught had set ringing, / now full of its only note, its lonely call." In *40 Sonnets*, Paterson returns to some of his central themes—contradiction and strangeness, tension and transformation, the dream world, and the divided self—in some of the most powerful and formally assured poems of his career.

The author of the acclaimed post-apocalyptic novel *The Old Man and the Wasteland* returns! Amid the remains of a world destroyed by a devastating Global Thermonuclear Armageddon, barbaric tribes rule the New American Dark Age. A boy and his horse must complete the final mission of the last United States soldier, and what unfolds is an epic journey across an America gone savage.

The Wish is a short, sharp, chilling story from Roald Dahl, the master of the shocking tale. In The Wish, Roald Dahl, one of the world's favourite authors, tells a sinister story about the darker side of human nature. Here, an imaginative boy plays a game that quickly gets out of hand . . . The Wish is taken from the short story collection Someone Like You, which

includes seventeen other devious and shocking stories, featuring the wife who serves a dish that baffles the police; a curious machine that reveals the horrifying truth about plants; the man waiting to be bitten by the venomous snake asleep on his stomach; and others.

'The absolute master of the twist in the tale.'

(Observer) This story is also available as a Penguin digital audio download read by the sublime Stephen Mangan. Roald Dahl, the brilliant and worldwide acclaimed author of Charlie and the Chocolate Factory, James and the Giant Peach, Matilda, and many more classics for children, also wrote scores of short stories for adults. These delightfully disturbing tales have often been filmed and were most recently the inspiration for the West End play, Roald Dahl's Twisted Tales by Jeremy Dyson. Roald Dahl's stories continue to make readers shiver today.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and O (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems

has been most significant.

You could say that my railroad, the Madham Line, is almost the most important thing in my life. Next to Andy Morrow, my best friend. Lots of people think Doug Hanson is a freak -- he gets beat up after school, and the girl of his dreams calls him a worm. Doug's only refuge is creating an elaborate bridge for the model railroad in his basement and hanging out with his best friend, Andy Morrow, a popular football star who could date any girl in school. Doug and Andy talk about everything -- except what happened at the Tuttle place a few years back. It does not matter to Andy that we live in completely different realities. I'm Andy's best friend. It does not matter to Andy that we hardly ever actually do anything together. As Doug retreats deeper and deeper into his own reality, long-buried secrets threaten to destroy both Doug and Andy -- and everything else in Doug's fragile world.

"As novelist and poet Andrei Codrescu points out in the essay that accompanies this selection of photographs from the Getty Museum's collection, Evans's photographs are the work of an artist whose temperament was distinctly at odds with Beals's impassioned rhetoric. Evans's photographs of Cuba were made by a young, still maturing artist who - as Codrescu argues - was just beginning to combine his early, formalist aesthetic with the social concerns that would figure prominently in his later work."--Jacket.
