This book is the product of more than half a century of leadership and innovation in physics education. When the first edition of University Physics by Francis W. Sears and Mark W. Zemansky was published in 1949, it was revolutionary among calculus-based physics textbooks in its emphasis on the fundamental principles of physics and how to apply them. The success of University Physics with generations of (several million) students and educators around the world is a testament to the merits of this approach and to the many innovations it has

introduced subsequently. In preparing this First Australian SI edition, our aim was to create a text that is the future of Physics Education in Australia. We have further enhanced and developed University Physics to assimilate the best ideas from education research with enhanced problem-solving instruction, pioneering visual and conceptual pedagogy, the first systematically enhanced problems, and the most pedagogically proven and widely used online homework and tutorial system in the world, Mastering Physics.

Enter the Alternative School is an in-depth examination of public school alternatives to traditional educational models in the US. This book analyses how urban education can respond to a system growing increasingly standardised and privatised. As an example, Central Park East Secondary School (CPESS), a public alternative schooling model, successfully served predominantly low-income and minority students. It also changed the New York City public school system while promoting methods that allowed educational institutions to make changes in the lives of their students. Written by a sociologist who was both a student at CPESS and a teacher at a school developed from the CPESS model, the book analyses education from a range of vantage points, assesses outcomes, and invites readers to consider the potential of alternative educational models to address the challenges of reforms that attempt to provide quality education to the low-income and minority students otherwise under served by public schools.
