Empower students to stand up for what matters Created in collaboration with children and teens, Owing Up helps young people identify and be critical of social issues in their lives—from bullying and harassment in the classroom to systems of power and oppression in the world around them. While there is no one-size-fits-all curriculum, Owing Up takes us leaps forward by: Designing sessions to be easily facilitated by a school counselor, teacher, leader, or other professional in small group settings Combining discussions, games, and role-playing to engage adolescents in the complexities of social culture Exploring critical topics such as media analysis, gender, sexual harassment, racism, gossip, and self-image This classic bestseller, now updated for today's diverse teaching force and student populations, explores the benefits of sociomoral practices in the classroom. The authors draw on recent research to show how these approaches work with children ages 2–8. They focus on how to establish and maintain a classroom environment that fosters children's intellectual, social, moral, emotional, and personality development. Extending the work of Jean Piaget, the authors advocate for a cooperative approach that contrasts with the coercion and unnecessary control that can be seen in many classrooms serving young children. Practical chapters demonstrate how the constructivist approach can be embedded in a school program by focusing on specific classroom situations and activities, such as resolving conflict, group time, rule making, decision making and voting, social and moral discussions, cooperative alternatives to discipline, and activity time.

Although the issues of conflict and violence cannot be blamed on schools, schools are one of the most logical places to tackle problems associated with conflict. This booklet offers practical tips to help school leaders, staff, and students resolve their disputes peacefully. It focuses on student-versus-student and student-versus-teacher conflicts. Part 1 describes systemic strategies for teachers and staff that use peer mediators to incorporate conflict management into the curriculum. The second part offers discussion starters and scenarios targeted primarily at problem solving among middle and high school students. Part 3 offers strategies to mitigate conflicts between students and educators. The best conflict-resolution programs help individuals help themselves by teaching empathy, anger management, impulse control, and listening skills. A list of resource organizations is included. (LMI) Making Things Right is designed to be used in

several ways: 1. To train students to become mediators and peacemakers in their classroom and at home and as peer mediators for their school. 2. To train students to understand and participate in a restorative justice/discipline structure in the classroom based on the book *Discipline That Restores: Strategies to Create Respect, Cooperation, and Responsibility in the Classroom* by Ron and Roxanne Claassen. 3. To train parents who want to understand and use a constructive conflict management strategy in their families. *Making Things Right* is divided into three sections. The first section consists of the lesson plans for each of thirty-two activities. The second section is called *Projections and Handouts* (larger print makes them easier to read when projected). The third section consists of the *Student Folder Items*. The time listed for each activity is an approximation and provided to help the teacher determine how they want to combine or use individual activities to fit their time frames. *Making Things Right* is designed to be used both for whole-class trainings in which lessons are taught on a daily basis spread over several days for one to two weeks, and for two-day student mediator training seminars. Our preference is to use the lessons with the entire class so all have the skills and strategies to be peaceful problem solvers. It is especially helpful for educating students about the theory, skills and strategies used in *Discipline That Restores*, also by Ron and Roxanne Claassen. *Discipline That Restores* gives teachers and administrators the knowledge and skills for implementing restorative justice discipline in the classroom and school. It is important for students to have as much knowledge of this structure and process as their teachers and school administrators so all are better able to constructively resolve conflicts together. Lessons are designed to help students learn and become equipped to understand and implement conflict and peacemaking theory,

skills and strategies. Students will learn some theory and be encouraged to develop their own theories for why we are interested in learning about new strategies for problem solving, and they will participate in lessons that will teach a specific process to use for problem solving and peacemaking as individuals in relationship with others and as mediators. Making Things Right provides activities that build student understanding of the mediation process and gives students a chance to practice the process through roleplay. This training will enable students to develop practical skills that will help them respond constructively to conflicts in many areas of their own lives as well as help others. Punishment for misbehavior causes resentment to grow, and what appears as evil intent is a consequence of that resentment. Punishment damages relationship at least a little and sometimes a lot. We have discovered that the most effective way to respond to misbehavior is to gain the cooperation of each person involved - it is rare that misbehavior involves only one person -then to sit down with them and help them solve the problem. Responding this way transforms an otherwise destructive event into a teaching and learning situation for everyone involved and builds relationship. Personal experience has shown that students, kindergarten and above, can understand and respond constructively; students grade four and above can readily understand and use these concepts in their own interpersonal conflicts and as mediators. Roxanne used this curriculum for many years with her 8th grade students and with parents. Many have used this curriculum to train high school students. All teachers make some adaptations to best use it with their audience. The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension "skills" at the expense of actual knowledge. In the tradition of Dale Russakoff's The Prize and Dana Goldstein's The Teacher Wars, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general public, including many parents, remains unaware. But The Knowledge Gap isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the

potential of our neediest children, we have no choice but to pay attention. The lessons in this guide teach high school students the essential skills they'll need to manage and resolve interpersonal conflict in creative, positive ways. Along the way students will also explore diversity, power, and prejudice as they continue to develop greater emotional and social skillfulness. Conflict Resolution in the High School contains: 36 core skill lessons An exploration of 8 different implementation models In-depth information on how to infuse conflict resolution into the standard high school curriculum Ideas for assessing student learning 9 additional, multi-period activities for taking the skills and concepts further The curriculum encourages students to connect the concepts and skills taught in the lessons to their own personal experiences. Students learn to analyze conflict, deal with feelings more effectively, defuse anger, and negotiate and mediate personal and group conflicts. Students also learn how to build more positive intergroup relations and explore how they can use their new skills and understandings to make a positive difference in their communities. A Toolkit Conflict Resolution Learning to Get Along Confessions of a Former Bully From Conflict to Conciliation Creating a Constructivist Atmosphere in Early Education Causes, Constraints, and Opportunities "How to Handle Difficult Parents" is a funny, but practical, guide to working effectively with parents and avoiding unnecessary conflict. Against the backdrop of the global financial crisis and rising food, fuel, and commodity prices, addressing poverty and inequality in the Philippines remains a challenge. The proportion of households living below the official poverty line has declined slowly and unevenly in the past four decades, and poverty reduction has been much slower than in neighboring countries such as the People's Republic of China, Indonesia, Thailand, and Viet Nam. Economic growth has gone through boom and bust cycles, and recent episodes of moderate economic expansion have had limited impact on the poor. Great inequality across income brackets, regions, and sectors, as well as unmanaged population growth, are considered

some of the key factors constraining poverty reduction efforts. This publication analyzes the causes of poverty and recommends ways to accelerate poverty reduction and achieve more inclusive growth. It also provides an overview of current government responses, strategies, and achievements in the fight against poverty and identifies and prioritizes future needs and interventions. The analysis is based on current literature and the latest available data, including the 2006 Family Income and Expenditure Survey.

Learn how to engage in and resolve conflict productively to improve work relationships and create a more equitable community for children.

Conflicts are inevitable, often hard to navigate, and can quickly multiply and become unmanageable. And resolving conflict requires self-reflection, understanding, and vulnerability. But knowing how to tackle difficult conversations will strengthen relationships, create a more equitable community, and improve the impact educators have on the young children they work with. The first of its kind, *Finding Your Way Through Conflict* specifically focuses on conflict in early childhood education settings and gives concrete steps and strategies to help manage and resolve it productively. Authors Chris Amirault, Ph.D., and Christine M. Snyder, M.A., have decades of experience in early childhood education programs and conflict resolution. Built on their expertise and their own experiences, the book's conflict scenarios are engaging and authentic, empowering educators to get in and out of conflict in a variety of personal, organization, and cultural contexts. Some of these scenarios include:

The Discombobulated Team: The children's artwork you posted in the classroom yesterday is gone. Who

took it down—and why? The Intent/Impact Disagreement: You were only trying to help! So why is that parent offended? The Unexpected Disaster: Your team planned every aspect of that difficult parent meeting for days. So why was it such a catastrophe? The UN Declaration and Programme of Action on a Culture of Peace was adopted by the UN General Assembly in 1999, and has, as one of its eight pillars, the aim of fostering an international peace culture through education. This book approaches the issues of social justice and peace studies from the perspective of gender equality. The book is designed as a training resource for pre-service and in-service teacher training at upper secondary school level, but can also be used at other educational levels as well as in non-formal education. Its aim is to help students develop the skills and capacities to promote the values and attitudes consistent with a culture of peace. The book also contains suggested reading and internet sites for further study.

Educational resource for teachers, parents and kids! After Katie gets caught teasing a schoolmate, she's told to meet with Mrs. Petrowski, the school counselor, so she can make right her wrong and learn to be a better friend. Bothered at first, it doesn't take long before Katie realizes that bullying has hurt not only the people around her, but her, too. Told from the unusual point of view of the bullier rather than the bullied, *Confessions of a Former Bully* provides kids with real life tools they can use to identify and stop relational aggression.

Transformative Classroom Management The natural condition of any classroom is harmonious, satisfying, and productive, so why do so many teachers struggle with problems of apathy, hostility, anxiety, inefficiency, and resistance? In this groundbreaking book, education expert John Shindler presents a powerful model, Transformative Classroom Management (TCM), that can be implemented by any teacher to restore the natural positive feelings in his or her classroom—the love of learning, collaboration, inspiration, and giving—and create a productive learning environment in which all students can achieve. Unlike other classroom management systems that view problems as something to be “handled,” TCM offers suggestions for creating optimal conditions for learning, performance, motivation, and growth. This practical book shows teachers how to abandon ineffective short-term gimmicks, bribes, and punishments and adopt the proven management practices and new habits of mind that will transform their classrooms. Praise for Transformative Classroom Management “Transformative Classroom Management is a practical resource that explains the how and why of classroom management for novice and veteran teachers. Dr. Shindler recognizes the importance of preserving the teacher’s sanity while ensuring the student’s development of a personal sense of responsibility and a positive self-esteem.” —EILEEN MATUS, principal, South Toms River Elementary School, New Jersey “I have read many other management books by other authors, but Transformative Classroom Management has been the best so far at demystifying the invisible forces in the classroom.” —WILL McELROY, 4th grade teacher, Los Angeles United School District “This book was an invaluable tool for me during my student teaching. It served as a reference book that I found myself continually drawn to while struggling to find ways to effectively manage 29 first graders. The ideas, concepts and suggestions in the book were so innovative and helpful that even my Master Teacher found herself implementing some of the ideas! A must have for all student teachers!” —CAROL GILLON, student teacher, Seattle

University “Insightful and thoroughly researched, Transformative Classroom Management is an invaluable tool to help teachers, newbies and veterans alike, develop fully functional and engaged learning communities.” —LISA GAMACHE RODRIGUEZ, teacher, Los Angeles Unified School District
