The extraordinary ability of dolphins to echolocate has fascinated scientists and the public since its discovery in the late 1950's. This is the first book to summarize modern research in this area, and presents a broad synthesis of this very interdisciplinary subject. The author is an internationally-recognized expert on dolphin sonar and is thus in a unique position to bring together research on the physiological, mathematical and engineering aspects of the subject. Of interest to auditory researchers, electrical engineers, acoustical physicists, and mammalian physiologists.

Two experts on marine mammals reveal how dolphins live their lives, communicate, and interact with one another and with other species, in an intimate and scientifically accurate portrait of these amazing and intelligent creatures.

This guide covers every known species of whale, porpoise, and dolphin and explains the evolution, classification, status, distribution, and natural history of whales

Have humans been sharing the planet with other intelligent life for millions of years without realizing it? In Defense of Dolphins combines accessible science and philosophy, surveying the latest research on dolphin intelligence and social behavior, to advocate for their ethical treatment. Encourages a reassessment of the human-dolphin relationship, arguing for an end to the inhuman treatment of dolphins Written by an expert philosopher with almost twenty-years of experience studying dolphins Combines up-to-date research supporting the sophisticated cognitive and emotional capacities of dolphins with entertaining first-hand accounts Looks at the serious questions of intelligent life, ethical treatment, and moral obligation Engaging and thought-provoking

The author describes his experiences as a rock musician and examines the development of popular music during the period of the 1960s

"This book seeks to elucidate both the historical and the present responses of a technologically dependent culture to the discourse of science and technology, as these responses are represented in its literature. Additionally, the book endeavors to analyze the mutual influences of science, technology, and literature in order to ascertain the degree to

which literature does serve, and might serve, to transform the roles of technology in Latin American society."--BOOK JACKET.

Arion and the Dolphin is an opera in nine scenes for professionals and community performers. The libretto is by Vikram Seth and the music is composed by Alec Roth. Recounted with Seth's inimitable charm, it is the story of Arion, a young musician at the court of Periander in Corinth. Thrown overboard on his return from a musical contest in Sicily, Arion is saved and befriended by a dolphin.

In this book, Achim Korber carefully examines the influence of environmental policy on trade policy. He explores environmental protectionism and models it using public choice theory. The author focuses on: -? a theoretical analysis of ecological protectionism and the potential misuse of environmental regulation as a tool to gain competitive advantage -? a comprehensive case study on the tuna-dolphin cases of the GATT/WTO. The study reveals that the US legislation was not - as it was widely perceived - a victory for the environmentalists but for the billion dollar industry of the US tuna canneries -? an in-depth literature survey on various approaches to protectionism including an analysis of lobbying models including the contest-success function. The Political Economy of Environmental Protectionism, with its wealth of new material, will be of great interest to environmental, political, and trade economists as well as policymakers and researchers. The "National Electrical Code 2011 Handbook" provides the full text of the updated code regulations alongside expert commentary from code specialists, offering code rationale, clarifications for new and updated rules, and practical, real-world advice on how to apply the code.

A Story of the People of the Sea

A fascinating study of the extra-human sensory capabilities of some animals and insects covers echolocation, internal navigation systems, and bioelectricity used by bees, birds, bats, fish, and dolphins to experience their world.

John Gaythwaite covers the design of marine structures for the berthing, mooring, and repair of vessels, including piers, wharves, bulkheads, quaywalls, dolphins, dry docks, floating docks, and various ancillary structures.

Provides a detailed description of European explorers' accounts of Tahiti in 1768 and shows that the romanticism surrounding that time was a result of the French people's misunderstanding of Tahitians' behavior.

Percival's naval career began in 1797 when he was impressed into British naval service aboard the HMS Victory and ended in 1846 after taking the USS Constitution on her only around-the-world cruise. This book draws from unpublished journals, letters, and logs to provide previously unknown details about Percival's adventures and the formative years of the U.S. Navy."

"This new book documents and illustrates the most recent work of

the sculptor David Wynne (born 1926), including Royal commissions, major public sculptures, smaller figure bronzes and wildlife subjects. The last book on David Wynne was published in 1975. This new volume now completes the picture up to the end of 1992." "David Wynne's public sculptures are familiar landmarks in cities and parks throughout Europe and America - there are nine in London alone. His smaller work is sought by collectors and museums all over the world. Public commissions include Boy with a Dolphin by Albert Bridge, Guy the Gorilla in Crystal Palace Park, both in London; God of the River Tyne in Newcastle; The Pasadena Bird Fountain in California; Grizzly Bear in New York State; and The Awakening Earth in Geneva." "His sculpture demonstrates an astonishing versatility of form and style. As an artist he enjoys worldwide patronage and the resulting commissions range from vast marble carvings, complex steel and bronze castings, to delicate human and animal figures." "This book includes contributions by David Wynne's patrons (among them HRH The Prince of Wales) and a catalogue of works. A special feature of the volume is its focus on the wildlife subjects and chapters on each of the larger sculptures, as well as work in progress for the Queen Mother's Gates at Hyde Park Corner, to be unveiled in summer 1993."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. A British ambassador's wife is forced to confront the dark side of living in America and the reality of the Cold War. On the basis of a mere handful of issues, The Dolphin and The Fleuron established an international reputation among professionals, scholars, and booklovers with an interest in fine bookmaking and the history of printing, illustration, and typography. Although the collected issues may be found in library collections, no complete listing of their contents has been available until now. Jeanne Somers' comprehensive index fills this gap, providing access in four separate sections to authors and titles, illustrations, subjects, and advertisements.
