Climate change is the greatest challenge facing humanity: drastic reduction of carbon emissions is vital if we are to avoid a catastrophe that devastates large parts of the world. Governments and businesses have been slow to act and individuals now need to take the lead. The Earth can absorb no more than 3 tonnes of carbon dioxide emissions each year for every person on the planet if we are to keep temperature and rainfall change within tolerable limits. Yet from cars and holiday flights to household appliances and the food on our plates, Western consumer lifestyles leave each of us responsible for over 12 tonnes of carbon dioxide a year - four times what the Earth can handle. Individual action is essential if we want to avoid climate

chaos. How to Live a Low-Carbon Life shows how easy it is to take responsibility, providing the first comprehensive, one-stop reference guide to calculating your CO2 emissions and reducing them to a sustainable 3 tonnes a year. I mean, what is Thebes? A theocracy? No. A meritocracy? Certainly not. A monarchy? Kind of. A patriarchy? Less and less so. Thebes is many things, and to revolutionise that? Well, how?

From Oedipus to Antigone, the story of Thebes remains a fascinating exploration of fate, morality and chaos, two and a half thousand years after the saga was originally written. The first domino falls as Oedipus realises he has unwittingly fulfilled a cruel and unusual prophecy. As control of Thebes is handed to Creon, his sons fight each other for the kingdom and his daughter Antigone is determined to serve the honour of her family to the bitter end. This version

weaves together Sophocles and Aeschylus to present the full, visceral and bloody account of the Oedipus dynasty.
