biplot G GEbiplot is user-friendly software designed for conducting biplot analysis of research data. It not only generates perfect biplots of all possible centering and scaling models but also provides tools to interpret the biplot in all possible perspectives,

many of them novel and unique.

GGEbiplot - biplot

GGE biplot analysis is a system that consists of a set of biplot graphs that are designed to address various research objectives when genotype by environment two-way data are analyzed; the most important ones are:

GGEbiplot - Biplot tools

A GGS-GGE biplot to represent the result of mega-environment analysis; A missing value estimation procedure has been built into GGEbiplot (based on a paper by Yan 2013 Crop Science). A spatial analysis module based on polynomial regression smoothing has been incorporated in the single trial ANOVA module. This guarantees opimal use of single trial data.
