Interactive mobile technologies have now become the core of many—if not all—fields of society. Not only do the younger generation of students expect a mobile working and learning environment, but also the new ideas, technologies and solutions introduced on a nearly daily basis also boost this trend. Discussing and assessing key trends in the mobile field were the primary aims of the 11th International Conference on Interactive Mobile Communication, Technologies and Learning (IMCL2017), which was held in Thessaloniki from 30 November to 01 December 2017. Since being founded in 2006, the conference has been devoted to new approaches in interactive mobile technologies, with a focus on learning. The IMCL conferences have in the meanwhile become a central forum of the exchange of new research results and relevant trends, as well as best practices. This book contains papers in the fields of: Future Trends and

Nathan Farrugia is in a class by himself. You can't help but enjoy this adventure." "What an amazing series. Plenty of action, thrills, gut-wrenching pace, cool weapons/gadgets and well written story." "Can I give this book 10 stars? It kept me on the edge of my seat from the first page to the last!" "The Fifth Column series is a tour de force. This amazing series deserves a 5 star review." "Really humorous, lots of action and the characters are so much fun. Loved it. Fast-paced, entertaining read." "I picked up a copy of The Chimera Vector thinking it would be a standard adventure novel. I was wrong. From the sands of the Middle East to the streets of New York, Nathan Farrugia has taken the techno-action/spy novel pioneered by David Morrell and given it steroids." "Farrugia weaves an amazing tale of power, deceit and double crosses. Espionage at its finest, intrigue that will tighten your gut and light every nerve on fire, The Chimera Vector goes far beyond science fiction and becomes a fast-paced mystery-thriller that defies early detection of where we are headed." "This is going down as one of the best series I've read. And that's saying something. Filled with intense action with enough sci-fi and thriller to make me grin like I found the girl of my dreams." "Loved it. High paced action thriller it definitely is. You think you know where it is going then the plot twists again. It really kept me turning the pages to see what was going to happen next." "An excellent fast paced series that merges science, science

fiction and adventure in one well written read that will make it impossible to put down." "Oh. Wow. What a book. I found The Chimera Vector to be well written, thoroughly entertaining, and at times unbearably suspenseful. I was literally holding my breath." "All the action that I really enjoyed in the first one and hoped would continue... the sequel blew that out of the ballpark. Amazing book, even better than the first, if that's possible! Love all the characters." "Be warned! This series is totally addictive. Don't start this unless you're ready for a wild action-packed ride." About the author Nathan M. Farrugia is an Australian technothriller writer, and author of the USA Today bestselling Helix and Fifth Column series. Nathan is known for placing himself in dangerous situations, including climbing rooftops in Russia and being hunted by special forces trackers in the United States. He studies Systema, a little-known martial art and former secret of Russian special forces. Beyond his army training, Nathan has trained under USMC, SEAL team, Spetsnaz and Defence Intelligence instructors, and the wilderness and tracking skills of the Chiricahua Apache scouts and Australian Aboriginals. The HTC Corporation is a global technology firm that was founded in 1997. Since its inception, the entity has become renowned for its creation of tablets, smartphones and electronic gadgets. The latest in its line of gadgets come in the form of the HTC Vive VR Gear or HTC Vive Pre, released to the public on April 5, 2016. The new

virtual reality headset boasts what reviews dub ' room scale ' technology and was designed to enable interactive motion and play by users. The Vive, which was created from a partnership between HTC and Value Corporation, employs the use of manual controls to interactive with the game. Users are able to enter an environment and communicate and interact with clarity and precision.

The introduction of consumer-level head-mounted devices (HMDs) has led to a major drop in the application costs of virtual reality (VR), making the technology available for a wide range of users. To understand if VR HMDs can be used for planning and training in the context of manual order picking, this thesis provides the results of a large-scale randomized controlled study in which order picking has been compared between a virtual and a real environment. The results imply that VR HMDs can indeed be used by manufacturers and warehouse operators in a rack planning process if the reduction of searching times or the perceived workload is in focus. Additionally, the findings enable the use of VR HMDs for scientific research on human-centred rack design. Finally, the thesis highlights the usability of VR HMDs for training manual order picking activities.

Die Mobilisierung unserer Gesellschaft trifft auf zahlreiche Entwicklungsprojekte mobiler Applikationen, die zunächst enthusiastisch begonnen wurden, letztlich aber gescheitert sind. Am Beispiel des Mobile Learning stellt Philipp Maske in diesem zweibändigen Werk heraus, dass Entwicklungsprozesse mobiler Applikationen von einem bisher unerforschten interdisziplinären Wirknetzwerk der Dimensionen Ökonomie, Technologie und Didaktik beeinflusst werden. Basierend auf diesem Wirknetzwerk wird ein Vorgehensmodell als Instrument der gestaltungsorientierten Wirtschaft konstruiert, dessen Nützlichkeit anhand einer Fallstudienimplementierung bewertet wird.
