In recent years, much work has been done in formulating and clarifying the concept of sustainable development and related theoretical and research issues. Now, the challenge has shifted to designing and stimulating processes of effective planning and decision-making, at all levels of human activity, in such a way as to achieve local and global sustainable development. Information technology can help a great deal in achieving sustainable development by providing well-designed and useful tools for decision makers. One such tool is the decision support system, or DSS. This book explores the area of DSS in the context of sustainable development. As DSS is a very new technique, especially in the developing world, this book will serve as a reference text, primarily for managers, government officials, and information professionals in developing countries. It covers the concept of sustainable development, defines DSS and how it can be used in the planning and management of sustainable development, and examines the state of the art in DSS use. Other interested readers will include students, teachers, and analysts in information sciences; DSS designers, developers, and implementors; and international development agencies.

A clear and practical introduction to second language acquisition, written for students encountering the topic for the first time.

The fifth edition of this well-regarded text covers the period up through the 2012 elections. It has been revised to make it sleeker, more concise, and up-to-date with a clear organisational structure. This edition accomplishes these three important goals: First, it introduces readers to the American approach to public policy making as it has been shaped by our political institutions, changing circumstances, and ideology. Second, it surveys American public policy and policymaking in all the major policy areas from economic policy to health care policy to environmental policy, and does so clearly and even-handedly, with well-selected illustrations, case studies, terms, and study questions. Finally, in addition to providing analytical tools and empirical information, the book challenges readers to come to terms with the widely shared but often competing values that must be balanced and rebalanced in the ongoing policy making process, affecting issues of the highest concern to the American public.

Sociocultural Theory in Second Language Education

In this accessible introduction to Vygotskyian sociocultural theory, narratives illuminate key concepts of the theory. These key concepts, addressed across seven chapters, include mediation; Zone of Proximal Development; collaborative dialogue; private speech; everyday and scientific concepts; the interrelatedness of cognition and emotion, activity theory and assessment. An eighth chapter provides readers with an opportunity to consider two additional narratives and apply the SCT concepts that they have become familiar with. These narratives come from individuals in a variety of languages, contexts, ages and proficiencies. We hear from learners, teachers and researchers. Intended for graduate and undergraduate audiences, this textbook includes controversies in the field, questions for collaborative discussion and provides references to important work in the literature of second language teaching, learning and research. This book presents a unique introduction to Sociocultural Theory. Through the telling of fascinating stories the authors familiarize the reader with the concepts that are central to the theory and in particular to how the theory relates to the teaching and learning of languages beyond the first. It is an exceptional piece of scholarship that I think Vygotsky would have wholeheartedly endorsed." James P. Lantolf, the Pennsylvania State University, USA "This book is a most welcome addition to the growing literature on sociocultural theory. It is refreshing to come across such a reader-friendly book dealing with complex constructs. The book provides an overview of key concepts in sociocultural theory, and then, using a set of narratives, illustrates how these concepts can be used to explain phenomena in second language learning and teaching. As such, the authors have succeeded in producing an accessible and highly engaging introduction to sociocultural theory." Neomy Storch, The University of Melbourne, Australia "Sociocultural Theory in Second Language Education is a highly recommended and worthwhile book for all those who seek to understand how sociocultural theory is entailed in teaching practice. Using narratives of teaching recounted in the voices of language learners and teachers, Swain and her co-authors bring the major concepts of Vygotsky to life in clear and accessible ways. Contributing to the conceptual analysis of each story is information on allied concepts, key studies, controversies and discussion topics. This book is certain to be a mainstay in language teacher education programs and in courses on sociocultural theory and second language acquisition." Richard Donato, University of Pittsburg, USA The authors, each from a different background, share a passion for sociocultural theory. Each author brings stories, data and experiences from her area of expertise: second language pedagogy and teacher development (Linda); elementary classroom teaching with second language and bilingual students (Penny) and teaching and research in bilingual education and second language learning (Merrill). Penny lectures at the University of Toronto. Linda is an associate professor at York University in Toronto. Merrill is a professor

emeritus at OISE University of Toronto.

Teaching Social Studies to English Language Learners provides readers with a comprehensive understanding of both the challenges that face English language learners (ELLs) and ways in which educators might address them in the social studies classroom. The authors offer context-specific strategies for the full range of the social studies curriculum, including geography, U.S. history, world history, economics, and government. These practical instructional strategies will effectively engage learners and can be incorporated as a regular part of instruction in any classroom. An annotated list of web and print resources completes the volume, making this a valuable reference to help social studies teachers meet the challenges of including all learners in effective instruction.

Features and updates to this new edition include:

- An updated and streamlined Part 1 provides an essential overview of ELL theory in a social studies specific-context.
- "Teaching Tips" offer helpful suggestions and ideas for creating and modifying lesson plans to be inclusive of ELLs.
- Additional practical examples and new pedagogical elements in Part 3 include more visuals, suggestions for harnessing new technologies, discussion questions, and reflection points.
- New material that takes into account the demands of the Common Core State Standards, as well as updates to the web and print resources in Part 4.

This book explores the responses of Chinese English teachers (CETs) and learners to the Native English-Speaking Teacher/Non-Native English-Speaking Teacher (NEST/NNEST) issue by examining the self-perceptions of Chinese English teachers, the perceptions of Chinese learners, and the real practices of the two groups of teachers in the classroom. It reveals how Chinese students' and teachers' perceptions are influenced by the combined forces of Chinese traditional culture and globalization, how Chinese English teachers' classroom practices reflect their perceptions, and how Chinese English teachers struggle to (re)construct their professional identity as English teachers in the dominant ideology and disempowering discourse of native-speakerism. The findings also shed light on the impacts of globalization on Chinese English teachers' professional identity and provide ways to empower them as English language teaching professionals. This book will appeal to a broad readership, including foreign-language teachers – especially NNESTs – around the world, graduate students majoring in sociolinguistics, and scholars of globalization.

Global Civil Society is a crucial concept in International Relations today, used as both a description of new mechanisms of non-state actor and NGO engagement in international policy-making and as a normative political project of international change. David Chandler critically investigates the claims made by the advocates of global civil society, analyzing the limits of the concept as a way of describing actual policy processes and the political dynamics behind the search for an international source of collective ethical values and social change.

English L2 Reading: Getting to the Bottom, Second Edition remains a comprehensive, myth-debunking examination of how L1 features (orthographic system, phonology, morphology) can influence English L2 reading at the "bottom" of the reading process. It provides a thorough but very accessible linguistic/psycholinguistic examination of the lowest levels of the reading process. It is both theoretical and practical. The goal is to balance or supplement (not replace) top-down approaches and methodologies with effective low-level options for teaching English reading. Core linguistic and psycholinguistic concepts are presented within the context of their application to teaching. The text clearly explains the strategies that readers of other languages develop in response to their own writing systems (Chinese, Japanese, Arabic, Hebrew, other alphabets, or transparent Roman alphabetic systems), contrasted with an explanation of the strategies that English readers develop in response to the opaque orthography of English, and explicates how other low-level processing strategies for L1 morphology and word formation may aid or hinder processing in English L2 reading acquisition. A complete, balanced reading ideology should be big enough to embrace all reading theories and practices. In particular, it should be able to accommodate those researchers and teachers who find that attention to the

details of language can also help students learn to read better. Many ESL/EFL teachers are interested in supplementing their successful whole-language methods with bottom-up reading strategies, but aren't sure how to do it. This book fills that gap. Changes in the Second Edition: \*updated content in each chapter and clearer organization for the student to make the text more reader friendly; \*expansion in Chapter 2 on alphabets, writing systems, and a brief history of written English and spelling; \*extended discussion in Chapter 3 of the cognition of written language and reading transfer; \*addition of phonemic, vocal, subvocal, and articulatory development and L2 reading processing in Chapter 4, as well as instructional activities and strategies for teaching these skills to L2 readers; \*elaboration of graphs and graphemes in Chapter 5, including discussion of developing graphemic knowledge, processing strategies, and their instructional application, and new sections on reading speed, pattern recognition, and word recognition; \*development of the probabilistic section in Chapter 6, particularly the probabilities in context of L2 reading; \*updated information on the topic of brain activation studies; and \*new treatment of the topic of reading fluency, added in responses to requests from many readers of the first edition. Intended for ESL/EFL reading researchers, teacher trainers and teachers, and as a text for MATESOL students, most chapters contain practical suggestions that teachers can incorporate into whole language methods to teach beginning or intermediate ESL/EFL reading (letters, pronunciation, "smart" phonics, morphemes, and vocabulary acquisition) in a more balanced way. Pre-reading discussion and study questions are provided to stimulate interest and enhance comprehension. End-of-chapter exercises help readers apply the concepts.

New Directions in Second Language Pragmatics brings together varying perspectives in second language (L2) pragmatics to show both historical developments in the field, while also looking towards the future, including theoretical, empirical, and implementation perspectives. This volume is divided in four sections: teaching and learning speech acts, assessing pragmatic competence, analyzing discourses in digital contexts, and current issues in L2 pragmatics. The chapters focus on various aspects related to the learning, teaching, and assessing of L2 pragmatics and cover a range of learning environments. The authors address current topics in L2 pragmatics such as: speech acts from a discursive perspective; pragmatics instruction in the foreign language classroom and during study abroad; assessment of pragmatic competence; research methods used to collect pragmatics data; pragmatics in computer-mediated contexts; the role of implicit and explicit knowledge; discourse markers as a resource for interaction; and the framework of translingual practice. Taken together, the chapters in this volume foreground innovations and new directions in the field of L2 pragmatics while, at the same time, ground their work in the existing literature. Consequently, this volume both highlights where the field of L2 pragmatics has been and offers cutting-edge insights into where it is going in the future.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

The Basics of American Government is a collaborative effort among eight current and one former faculty members in the Departments of Political Science and Criminal Justice at University of North Georgia. The purpose of this book is to offer a no-frills, low-cost, yet comprehensive overview of the American political system for students taking introductory courses in American national government. Furthermore, the work combines the best aspects of both a traditional textbook and a reader in that most chapters offer a piece of original scholarship as a case study to bolster or reinforce the material presented in the chapter. In addition, many chapters present a civic engagement-type exercise and discussion questions intended to challenge, engage, and foster student participation in the political system. The authors undertook this project for several reasons, most notably the high costs of textbooks for students and the lack of college-level scholarship found in most American Government texts. This 375-page, peer-reviewed, edited book that combines traditional material with original scholarship will cost students \$27.99, well below market standards. All of the authors are experienced classroom instructors, subject matter experts, and published researchers in the field of American politics.

This collection of case studies is special for several reasons. Firstly, because of the geographical and institutional diversity of the authors, bringing together experiences of teaching under COVID-19 restrictions in the university language classroom from 18 countries and five continents. Secondly, the publication is interesting because of the variety of case studies that testify to different strategies and emphases in dealing with pandemic-related challenges. Finally, the case studies collected strikingly demonstrate the creative responses of language teachers in a variety of contexts to meet the challenges of the pandemic crisis (Dr Sabina Schaffner).

Besides covering the most recently released versions of GCC, this book provides a complete command reference, explains how to use the info online help system, and covers material not covered in other texts, including profiling, test coverage, and how to build and install GCC on a variety of operating system and hardware platforms. It also covers how to integrate with other GNU development tools, including automake, autoconf, and libtool.

This book examines the increasing popularity of creativity and play in tertiary learning, and how it can be harnessed to enhance the student experience at university. While play is often misunderstood as something ' trivial ' and associated with early years education, the editors and contributors argue that play contributes to social and human development and relations at a fundamental level. This volume invalidates the commonly held assumption that play is only for children, drawing together numerous case studies from higher education that demonstrate how researchers, students and managers can benefit from play as a means of liberating thought, overturning obstacles and discovering fresh approaches to persistent challenges. This diverse and wide-ranging edited collection unites play theory and practice to address the gulf in research on this fascinating topic. It will be of interest and value to educators, students and scholars of play and creativity, as well as practitioners and academic leaders looking to incorporate play into the curriculum.

This research collection presents a critical review of the materials used for learning English around the world. The first section includes a discussion of materials for specific learners and purposes, such as young learners, self-study, academic writing and general proficiency. Taking both the teacher's and the learner's needs into consideration, the book makes a positive contribution to the future of research in materials development, and has practical applications. This comprehensive, critical analysis of materials in use around the world will be useful for academics researching materials development and applied linguistics and for students on post-graduate applied linguistics and ELT courses.

Despite the Covid-19 pandemic, the EUROCALL society succeeded in holding the 28th EUROCALL conference, EUROCALL2020, on 20-21 August as an online, two-day gathering. The transition process required to make this happen was demanding and insightful for everyone involved, and, in many ways, a logical consequence of the core content and purpose of EUROCALL. Who would be better suited to transform an onsite conference into an online event than EUROCALL? CALL for widening participation was this year ' s theme. We welcomed contributions from both theoretical and practical perspectives in relation to the many forms and contexts of CALL. We particularly welcomed longitudinal studies or studies that revisited earlier studies. The academic committee accepted 300 abstracts for paper presentations, symposia, workshops, and posters under this theme; 57 short papers are published in this volume. We hope you will enjoy reading this volume, the first one to reflect a one hundred percent online EUROCALL conference/Online Gathering.

This book examines the challenges of cross-professional comparisons and proposes new forms of performance assessment to be used in professions education. It addresses how complex issues are learned and assessed across and within different disciplines and professions in order to move the process of " performance assessment for learning " to the next level. In order to be better equipped

to cope with increasing complexity, change and diversity in professional education and performance assessment, administrators and educators will engage in crucial systems thinking. The main question discussed by the book is how the required competence in the performance of students can be assessed during their professional education at both undergraduate and graduate levels. To answer this question, the book identifies unresolved issues and clarifies conceptual elements for performance assessment. It reviews the development of constructs that cross disciplines and professions such as critical thinking, clinical reasoning, and problem solving. It discusses what it means to instruct and assess students within their own domain of study and across various roles in multiple contexts, but also what it means to instruct and assess students across domains of study in order to judge integration and transfer of learning outcomes. Finally, the book examines what it takes for administrators and educators to develop competence in assessment, such as reliably judging student work in relation to criteria from multiple sources. "... the co-editors of this volume, Marcia Mentkowski and Paul F. Wimmers, are associated with two institutions whose characters are so intimately associated with the insight that assessment must be integrated with curriculum and instructional program if it is to become a powerful influence on the educational process ..."
