reentrant tachycardia, tachycardias related to accessory atrioventricular connections, and ventricular tachycardia, transseptal catheterization, ablation for pediatric patients, and patient safety and complications.

A must-have manual for anyone working with instruments in the clinical environment! Instrumentation for the Operating Room: A Photographic Manual, 9th Edition provides a practical, true-color guide to today's most commonly used surgical instruments. A reader-friendly format includes clear instructions on preparation, sterilization, and setup, and goes beyond other books in showing not only individual instruments but also instruments in sets according to surgical procedure. This edition includes 13 new chapters as well as many new photographs throughout the book. Written by an experienced perioperative nurse, Shirley Tighe, this resource includes more than 1,000 photographs of instruments and instrument tips in the book and on the Evolve companion website - that's more than any other manual! Over 800 photographs in the book show both individual and sets of instruments, including whole instruments and instrument tips, to help in distinguishing between similar types. Instrument Preparation for Surgery unit discusses the importance of proper instrument handling and sterilization, including proper placement within sterilization trays. Entire unit on female reproductive surgery focuses on a key area not well covered in other books. Excellent quality of photos is enhanced by a consistent background to show the detail and true color of the instruments. A logical organization covers instruments by surgical procedures, beginning with simpler surgeries and progressing to more specialized instruments and their setups. Coverage of instrumentation addresses a single surgery in each chapter, showing instruments first as a set, then displaying them individually, and featuring instrument tips as appropriate. Spiral-bound format

allows the book to lay flat for easier access while on the job. Six NEW chapters are included in the updated Genitourinary Surgery unit. NEW photographs are added to the Neurosurgery unit. NEW! Evolve companion website includes photographs and images of less common procedures.

Digital communication is significantly expanding new opportunities and challenges in the tourism industry. Tourists, now more frequently than ever, bring their smartphones with them to every destination, and cultural tourists are particularly motivated to utilize a variety of services and platforms as they are especially open and interested in understanding in detail the places and heritage of the places they visit. Thus, researchers, educators, and professionals in the tourism and hospitality field should take advantage of this opportunity to

propose new ways of presenting better content and creating a more immersive and optimized experience for tourists. The Handbook of Research on Digital Communications, Internet of Things, and the Future of Cultural Tourism shares research and experiences on the convergence between digital communication and cultural tourism, specifically the migration and creative appropriation of these technologies for increased tourist engagement and their role in destination marketing and strategic planning and decision making. Covering topics such as big data, e-tourism, and social media platforms, this major reference work is an invaluable resource for researchers, students, professors, academicians, government entities, museum managers, professionals, and cultural tourism managers and facilitators.

The Nurse Staffing Agency: Business Formation and Operation Manual was created by Resource Nurse Staffing-Research and Development Company (RNS-RD). RNS-RD is comprised of a team of nurses with over thirty years experience in vastly different specialty areas in health care: business, research, clinical and managed care, to name a few. RNS-RD seeks to empower clinicians from all areas of health care to dominate and take charge of their career through collaboration and entrepreneurship. RNS-RD is not a consulting firm. We do not offer courses or seminars. RNS-RD offers easy-to-read, easy-to-comprehend step-by-step DIY (do it yourself) guidelines on how to start and operate a profitable, manageable nurse staffing agency. Why DIY? DIY guidelines are economical and drive the business owners to learn the process. According to data from the US Bureau of Labor Statistics, about 20 percent of US small businesses fail within the first year. By the end of their fifth year, roughly 50 percent have faltered. This is partly because new business owners are not studying and taking the time to truly learn their market. If you are thinking about becoming a nurse staff agency owner, let RNS-RD help you jump-start your plan!
