Born into a family of migrant workers, toiling in the fields by the age of six, Jose M. Hernández dreamed of traveling through the night skies on a rocket ship. REACHING FOR THE STARS is the inspiring story of how he realized that dream, becoming the first Mexican-American astronaut. Hernández didn't speak English till he was 12, and his peers often joined gangs, or skipped school. And yet, by his twenties he was part of an elite team helping develop technology for the early detection of breast cancer. He was turned down by NASA eleven times on his long journey to donning that famous orange space suit. Hernández message of hard work, education, perseverance, of "reaching for the stars," makes this a classic American autobiography.

Nissan Z: 50 Years of Exhilarating Performance is the Nissan-official chronicle of Z history, from Datsun's planning for the new model in the late 1960s through the latest 50th anniversary Nissan 370Z. The Datsun 240Z revolutionized the sports car industry and demolished established assumptions about Japanese automakers. With the Z, Datsun gave the world a sleek, sexy, fast product—one that forever banished the idea that Japanese manufacturers could only build economy cars. Over the past 50 years, six generations of the Z car have generated a massive, devoted following. More than 1.5 million cars have been sold worldwide. The retro-inspired 350Z reinvigorated the Z's fortunes in the 21st century, and the latest incarnation, the 370Z, continues the tradition of high-performance in a modern, affordable package. In addition to a complete history of the Z, this handsomely illustrated book examines the car's significant racing history with successes in IMSA and SCCA sports car racing, including extensive racing by Paul Newman for Bob Sharp and John Morton with Brock Racing Enterprises. Special attention is devoted to the cult of Z-fans around the world who have supported Nissan's sports car through thick and thin and the early car's emergence as a rapidly appreciating collector car. The story is told by author Pete Evanow, who has enjoyed a long relationship with Nissan. His insights into the history of this automotive icon provide a fresh, compelling perspective on the five decades of the Z that no

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

This is the first significant publication to explore the output of Matt Keegan, the New York-based artist known for his work across mediums, as well as independent publishing including the acclaimed editioned art journal North Drive Press. This monograph expands on a recent solo exhibition by the artist at Rogaland Kunstcenter; Stavanger, Norway, titled "Portable Document Format." The show was organized as an idiosyncratic retrospective, with Keegan remaking sculptures dating from 2006 to 2015, initially fabricated in Sheetrock and steel, in cardboard. Like the exhibition, the publication serves both as a project and a reference for the artist's work. Essays by Tom McDonough and John Miller theorize Keegan's production, while interviews with Sara VanDerBeek and Anna Craycroft underscore the artist's ongoing engagement with his peer group. Furthered by contributions from colleagues Uri Aran, Leslie Hewitt and James Richards, situated alongside full-color installation photos and reproductions of work from the past decade, Matt Keegan: OR provides a solid introduction and layered overview of the artist's multifarious practice.
