Listed below are links to a picture and data

on six living things you find on the island.

Classify these living things using the data

your group collected and report how you

came to the final classification answer. This

can be done in the form of a flowchart for

each living thing and/or one for each and

one combining all six into one.

The Six Kingdoms. When Linnaeus

developed his system of classification, there

were only two kingdoms, Plants and

Animals. But the use of the microscope led

to the discovery of new organisms and the

identification of differences in cells. A two-

kingdom system was no longer useful.
