 The definitive guide for adventurers crossing the

continent since its first edition in 1991. Kuno Gross: Most probably the readers of this magazine have never heard of the original TRACKS. I was in the very same situation until by the end of 2020, when NZ LRDG-historian Brendan O'Carroll has provided me with a hardly readable copy of the June 1941 issue of TRACKS. I was immediately fascinated by these windows into the past and just thought: "We should revive TRACKS!" The editor of the original Tracks was, that time 20 years old, TA Sgt. N.A Moore, a clerk attached to LRDG Group HQ. The June 1941 issue was created by him when the LRDG HQ was located at Kufra. There he got the idea to create a "house paper" for the unit. He recalled in a letter which was published in the 1991 Newsletter of the LRDG Association, that there were only a very limited number of people who were willing to contribute and that this first edition was mainly launched thanks to the contribution of Lieut. Col. Bagnold and Captain Kennedy Shaw. And indeed, the June 1941 remained the single and only issue of Tracks - it was never published again.... until today!

 The effect of biodiesel blended fuels on exhaust emissions of diesel engines was investigated. The test fuels were 2%, 5%, 20% of rapeseed methyl ester, pure rapeseed methyl ester, 2%, 5%, 20% of palm stearin methyl ester, pure palm stearin methyl ester, 20%, 30%, 40% of used cooking oil methyl ester. Two kinds of test vehicles were Toyota D4D 2.5L and Isuzu DMAX 2.5L. The exhaust emissions analysis were carried out by running on chassis dynamometer. The results showed that the blends of 2%, 5% of palm stearin methyl ester and rapeseed methyl ester showed did not significant difference in exhaust emissions and fuel consumption compared to based diesel. In the other hand, the blends of 5% showed tendency reduction of THC and PM emissions. The blends of 20% with all kinds methyl ester, the THC, PM

emissions were decreased 10-34% and 6-34% while the fuel consumption was increased 2-5%. Used cooking oil methyl ester blended with diesel in ratio 30, 40% were decreased THC, PM emissions 18-27% and 16-36%. NOX emissions and fuel consumption were increased 7%, 5-6%. Pure palm stearin methyl ester and rapeseed methyl ester provides a greater reduction of all exhaust emissions. On the contrary, NOX emission and fuel consumption were increased.

Tajikistan is Central Asia's smallest and least understood country. Epic mountain landscapes, glacial lakes and the mighty Oxus River encircle ancient Buddhist sites, Silk Road trading posts, medieval shrines and planned Soviet cities. The guide includes tried and tested trekking routes in the Fann, Zerafshan and Pamir mountain ranges for various levels of experience. Comprehensive bird-watching and wildlife sections are provided by BBC journalist Ben Tavener. Rich historical detail and entertaining anecdotes are drawn from the historical archives of the Royal Society for Asian Affairs and with first-hand descriptions of everything from Soghdian ruins to playing the traditional sport of buz kashi or 'dead goat polo', Tajikistan's authors bring the country alive.

Be vigilant when driving through Africa: camels are careless when crossing the road, and women carrying waterpots are little more watchful. So warn the authors of this fifth edition of Africa Overland. They also give updated information on each country's political and security situation (Angola, Sierra Leone and Liberia are on the up; since this guide's last edition, security in Western Sudan and Eastern Chad has turned sour); provide an expanded Route Outlines section including information on border crossings; and offer revised recommendations on vehicles including practical coverage on buying a vehicle, maintenance and driving. 'This is the ultimate roadies' guide to traversing the wilderness of Africa. An indispensable guide to negotiating the uncharted perils of Africa's vast plains.' Daily Express (UK)
